

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, DC, 20554

In the Matter of)	
Creation of a Low)	MB Docket No. 99-25
Power Radio Service)	

My Name is Mark Snow. I am writing to applaud the FCC for the creation of the LPFM services and to support any actions to expand and promote LPFM.

I would particularly like to address and propose the following regarding displacement of existing LPFM Stations.

I understand and agree that the current minimum spacing rules should routinely be used for LPFM station allocations.

However, In the case of displacement of existing stations where no other viable channels are available, I feel that LPFM stations should have the option to move to an available frequency and operate using the current FM translator interference rules. Further, a displaced LPFM should be able to ask for a waiver of 74.1204 like translators, so that they may use 2nd and 3rd adjacent frequencies if needed.

It is logical that a station originating local programming should have the same technical options as stations that are repeating distant programming.

Again, I propose that this should be an option of the displaced LPFM, understanding the risks involved.

Thank you very much for your support of LPFM.

Sincerely,

Mark Snow
